

Experiment 4a

NAME: ASWIN SIDDHARTH A

ROLL NO: 240701064

**Conduct task analysis for an app (online shopping) and document user flows.
Create corresponding wireframes using Lucidchart.**

AIM:

To understand and document the steps a user takes to complete the main tasks within an online shopping app and represent them using user flows and wireframes in Lucidchart.

PROCEDURE:

Step 1: Assigning Tasks

The following main tasks were identified:

1. Browsing Products
2. Searching for a Specific Product
3. Adding a Product to the Cart
4. Checking Out

Step 2: Document User Flows

1. Browsing Products

- User opens the application
- User lands on the home screen
- User selects a product category
- User views product list
- User selects a product to view details

2. Searching for a Specific Product

- User taps on search bar
- User enters product name or keyword
- System displays search results
- User selects a product
- User views product details

3. Adding a Product to the Cart

- User browses or searches for a product
- User opens product details
- User clicks "Add to Cart"

4. Checking Out

- User opens cart
- User reviews selected items
- User proceeds to checkout
- System checks if user is logged in
- If not logged in → user logs in/registers
- User enters shipping details
- User enters payment details
- User places order
