

Exercise 5a

NAME: ASWIN SIDDHARTH A

ROLL NO: 240701064

UI Design Lifecycle using RAD Model with Axure RP

AIM:

To demonstrate the lifecycle stages of UI design using the **Rapid Application Development (RAD)** model and to develop a small interactive interface using **Axure RP**.

PROCEDURE:

Requirements Planning

1. Identify Key Features

The application chosen: **Shopping App Interface**

Core Features:

- Navigation:
 - Home
 - Product Categories
 - Product Listings
 - Product Details
 - Cart
 - Checkout
 - Order Confirmation
 - Order History
- User Actions:
 - Browsing products
 - Searching items
 - Adding to cart
 - Checkout process

2. Requirements Document

Sample User Stories:

- As a user, I want to browse products so that I can choose items to buy.
- As a user, I want to add items to my cart so that I can purchase them later.
- As a user, I want to track my orders so that I know delivery status.

Use Cases:

- Search Product
- View Product Details
- Add to Cart
- Checkout
- View Order History

User Design

1. Install and Launch Tool

- Download from: <https://www.axure.com/>
- Install and open **Axure RP**

2. Create New Project

- File → New
- Project Name: *Shop*

3. Create Wireframes

Design screens using drag-and-drop widgets:

- Home Page

- Product Categories

Categories

Select Anyone

- Cart
