

## Experiment 3a

NAME: ASWIN SIDDHARTH A

ROLL NO: 240701064

**Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io**

### AIM:

The aim is to develop a prototype incorporating both familiar and novel navigation elements and assess usability among diverse user groups using Proto.io.

### PROCEDURE:

#### Step 1: Sign Up and Log In

1. Go to <https://proto.io>
2. Sign up for a new account or log in if you already have one.

#### Step 2: Create a New Project

1. Click on "Create New Project."
2. Give your project a name (**Simple App**).
3. Select device type (Mobile – iPhone X).
4. Click "Create."

#### Step 3: Design the Home Screen

1. Add a new screen named **Home**
2. Add elements:
  - Header → "Chess Shop"
  - Button → "Shop Now"
3. Add interaction:
  - Tap → Navigate to Product Screen

?

i

# Chess Shop

SHOP NOW

#### Step 4: Design the Product Screen

1. Add product images
2. Add **Cart button**
3. Add interactions:
  - Tap → Go to Cart screen
  - (Unfamiliar) Swipe → Browse products

### Step 5: Design the Cart Screen

1. Display selected product
2. Show price (₹799)
3. Add **Buy** button

### Step 6: Design Order Confirmation Screen

1. Show message: **Order Booked**
2. Add **Continue Shopping** button

### **Step 7: Preview the Prototype**

1. Click Preview
2. Test navigation between screens

### **Step 8: Share the Prototype**

1. Click Share
2. Copy link and send for testing

### **RESULT**

The prototype was successfully created using Proto.io.

Familiar navigation elements improved usability, while unfamiliar elements added innovation but required user learning.
